

Thursday 7:00 - 9:00 PM - Conference Kick Off

Thursday, 7:00 PM

Science Showcase

Prairie B

SDSTA President Alison Bowers and other officers

Bring an activity to share with colleagues that relates to your science classroom. Share your lesson by bringing copies to share or a link (or send an email to officers@SDSTA.org to post to their web). Pizza will be provided for those who attend!

Thursday, 7:00 PM

Math Potluck

Prairie C

SDCTM President Sharon Vestal and other officers

Network with other math teachers! Share your favorite activities and lessons! Swap teaching ideas! Sharing math teaching ideas will be the focus of this session. Bring 25 copies of your favorite activity to share. Leave with ideas from other great teachers. Pizza will be provided for those who attend!

- Friday 8:00 AM - Conference -

Friday, 8:00 AM

Prairie A - B - C

SDCTM President Sharon Vestal and SDSTA President Alison Bowers

Opening Session - Conference Welcome for All

Pre-Service, Elementary, Middle School, High School, College

Math, Science, STEM

Featured Speakers & others will give you a Conference overview. Conference layout, credit options and many other items will be discussed. Any questions?

- Friday 8:30 AM -

Friday, 8:30 AM

Dakota A

Anne Lewis, Dr. Chris Anderson, Megan Howard, Kristie Maher South Dakota Discovery Center

Teaching Science through...Chameleon Tongues? isa

annelewis@sd-discovery.org christopher.V.Anders@usd.edu; megan.m.howard@northern.edu;

kristie.maher@k12.sd.us Middle School, High School Science

What happens when you pair a researcher with teachers? Find out in this session. USD professor Chris Anderson and teachers explored how research on, yes, chameleon tongues can be used to teach science. Learn a fun, hands-on activity and hear from a classroom teacher about how understanding how research works impacted her approach to teaching.

Friday, 8:30 AM

Dakota B

Kristine Heinen South Dakota Discovery Center

360° Big Screen Adventures!

kristineheinen@sd-discovery.org

Elementary, Middle School, High School

Science, STEM

Gather round our planetarium, journey to the unknown! With limitless possibilities, this session gives you a taste of the SD Discovery Center's traveling dome. Ancient SD seas to the ends of the universe—start an unforgettable adventure and learn how to bring our Journey Beyond the Known Planetarium to your students.

Friday, 8:30 AM

Dakota C

Dr. Ryan Schrenk Montana Digital Academy

Scale, Support, Succeed: Mastering Math Transitions with EdReady Classroom

ryan@mtda.org Middle School, High School, College

Math

Get results! Master math transitions! Learn how we prepare students for middle/high school algebra and college math using Montana's proven EdReady Classroom model. With 12 years of experience and 25,000+ enrollments in 2024, our proficiency-based online program and expert support ensure students are ready for their next step.

Friday, 8:30 AM

Dakota E

Betsy Schamber Dakota State University

Making Moon Craters: Inquiry into the Science and Engineering Practices

betsy.schamber@dsu.edu Elementary, Middle School

Science

In this interactive session, participants will investigate moon craters through a hands-on inquiry project that embeds the Science and Engineering Practices from the Next Generation Science Standards. Using inquiry to explore each practice, participants will experience strategies that spark curiosity, encourage critical thinking, and deepen student-centered science learning.

Friday, 8:30 AM

Dakota F

Raegan Kleinpeter South Dakota Discovery Center

Robotics in the Classroom

raegankleinpeter@sd-discovery.org Elementary, Middle School, High School Science, Math, STEM

Wondering how to bring robots into your classroom? No more! Explore multiple robots and different ways to include them in your existing cross-curricular lessons. From grab-and-go robots to more complex code engineering, you do not have to be an expert to spark your students' robotic curiosity!

Friday, 8:30 AM

Dakota G

Matt Miller South Dakota State University

Utilizing Green Chemistry to Illustrate Science Concepts

Matt.Miller@sdstate.edu Middle School, High School

Science, STEM

Green chemistry is the concept that we should be careful about what we use so as not to cause additional contamination from the products of our chemical activities. Various examples of green chemistry activities will be used in a hands-on workshop to illustrate green chemical principles.

Friday, 8:30 AM

Dakota H

Louisa Otto, Benjamin Benson Sanford Research

Bringing Biomedical Research to the Classroom

louisa.otto@sanfordhealth.org benjamin.benson@sanfordhealth.org

Elementary, Middle School, High School, College

Science, STEM

Sanford PROMISE, the outreach arm of Sanford Research, connects educators with current biomedical science. This session highlights recent research advances and shares classroom-ready resources to engage students in authentic inquiry. Participants are encouraged to provide feedback on how Sanford PROMISE can further support science teaching and learning.

- Friday 9:30 AM -

Friday, 9:30 AM

Prairie A

Katy Dornbos **Featured Speaker**

More Feedback, Less Grading

kldornbos@gmail.com Elementary, Middle School, High School, College Science, Math, STEM
Feedback is crucial to learning, and grading can be an obstacle to quick feedback. I will share small changes that increase feedback to students without requiring more time/energy from the teacher.

Friday, 9:30 AM

Prairie B

John Golden **Featured Speaker** Grand Valley State University

Listen

goldenj@gvsu.edu Elementary, Middle School, High School Math
Eliciting learner thinking is a core teaching practice. We'll consider how to improve our questioning and investigate other opportunities to hear how learners are thinking and what their ideas are about important concepts and processes.

Friday, 9:30 AM

Prairie C

RunningHorse Livingston **Featured Speaker** CEO of *Mathematize Inc.*

Bringing STEM Inquiry to Life in the Elementary Classroom

mathematize@outlook.com Math
This workshop introduces engaging, age-appropriate engineering challenges that support problem-solving skills and STEM confidence in students. Teachers will work in groups to plan, build, test, and refine simple designs using low-cost materials. We'll break down the engineering design cycle for early grades and discuss how to encourage productive struggle and reflection. We'll explore how to guide students to ask questions, test ideas, and communicate their reasoning. Participants will leave with classroom-ready challenge prompts and facilitation strategies to inspire young engineers of all abilities.

Friday, 9:30 AM

Dakota A

Branden Hoefert University of South Dakota

From Play to Programming: Computational Thinking with Robots in the Elementary Classroom

branden.hoefert@usd.edu Elementary STEM
Integrating robotics into elementary classrooms fosters computational thinking and problem-solving skills. In this interactive session, participants will explore hands-on activities with Sphero Indi robots to see how young learners can develop foundational coding and problem-solving abilities while integrating robotics across the curriculum. No prior coding experience is required!

Friday, 9:30 AM

Dakota B

Linda Stegemann

Featured Speaker

PhET Interactive Simulations

Meet PhET Studio: Interact Your Way

linda.stegemann@colorado.edu Elementary, Middle School, High School, College Science, Math, STEM
Be empowered with PhET Studio, PhET's first customization tool for teachers! Learn how to create unique sim experiences that fit your lessons and inspire students like never before. Join us to see Studio in action and start a free trial. Don't miss this exclusive opportunity!

Friday, 9:30 AM

Dakota C

Major Jonathan Becker

South Dakota Wing Civil Air Patrol

Free STEM Resources from the Civil Air Patrol

jon.becker@sdwg.cap.gov Elementary, Middle School, High School Science, Math, STEM
Civil Air Patrol (CAP) educates about the important role aviation, space, cyber, and STEM play in America's future. Learn about joining CAP as an Aerospace Education Member (AEM) to enjoy free aerospace/STEM educational resources and opportunities, including STEM Kits, standards-based K-12 curriculum materials, and teacher orientation flights.

Friday, 9:30 AM

Dakota D

Laura Bain

CPM Educational Program

When Math Gets Tough: Helping Students Thrive Through Productive Struggle

laurabain@cpm.org

Middle School, High School

Math

How can we help middle and high school students approach math challenges with confidence and curiosity? This session explores ways to make struggle productive by fostering understanding, agency, and positive math identities. Learn practical strategies for building community, planning purposeful challenges, and guiding students to embrace meaningful mathematical struggle.

Friday, 9:30 AM

Dakota F

Katrina Donovan

South Dakota Mines

Ceramic & Glass Industry Science Kits

katrina.donovan@sdsmt.edu Elementary, Middle School, High School, College Science, STEM
Seven hands-on modules for attendees to experience. The attendees will learn about Glass Fibers, Magic Color Beads and UV Light, Silly Putty Science, Shape Memory Alloy, Fiber Optics, Heated Aluminum Nails, and Fluorescence. Attendees will walk out with their very own mini materials kit (\$49 value for free!)

Friday, 9:30 AM

Dakota G

Colin Marsh

SDCTM

Conversations on Building Thinking Classrooms: What's Working & What's Hard

marshcolin180@gmail.com Elementary, Middle School, High School, College Science, Math
Come discuss the challenges and benefits of using Building Thinking Classrooms practices in your math classroom. This is an opportunity for both experienced educators and educators interested in using BTC to have conversations. I will provide a platform to discuss common questions regarding BTC.

Friday, 9:30 AM

Dakota H

Ben Benson, Louisa Otto

Sanford Research

Artificial Intelligence in the Biomedical Research Lab

Benjamin.benson@sanfordhealth.org Louisa.Otto@SanfordHealth.org

Middle School, High School, College

Science, Math, STEM

This session builds AI literacy by exploring how computer science intersects with biology and biomedical research. Participants will examine AI's strengths, pitfalls, and potential harms, practice strategies for responsible use, and engage with hands-on tools. Reflection activities highlight ethical impacts while fostering cross-disciplinary connections for teaching and research.

Friday, 9:30 AM

Symposium

Mark Iverson & Brooks Jacobsen

Lake Area Technical College

Building South Dakota's STEM Teaching & Learning Community

mark.iverson@lakeareatech.edu Brooks.jacobsen@lakeareatech.edu Middle & High School, College STEM

Discover how Lake Area Technical College's NSF-ATE project is building a statewide Teaching & Learning Resource Community to connect and empower South Dakota's STEM and technical educators. Participants will gain access to classroom-ready resources, upcoming PD opportunities, and direct industry connections supporting hands-on, high-impact STEM teaching.

Friday, 9:30 AM

Salon

Sandra Shipley

Bison School

Algae Academy - A Free Resource for Hands-on Science

Sandra.Shipley@k12.sd.us

Elementary & Middle School

Science, STEM

Algae Academy is a great free and scripted resource to learn about algae and the many applications in our world today. It is easy to teach and fun to grow algae in the classroom.

- Friday 10:30 AM -

Friday, 10:30 AM

Prairie A

Katy Dornbos

Featured Speaker

The Beauty & Fun of Graphs

kldornbos@gmail.com

High School, College

Science

Data, graphs, maps - they're wonderful, full of information, and fun to create. Participants will engage in two activities that get students thinking about data, wondering about how it's collected, and building a graph with real time data. Note: part of the session is chemistry specific.

Friday, 10:30 AM

Prairie B

John Golden

Featured Speaker

Grand Valley State University

Play

goldenj@gvsu.edu

Elementary

Math

Play is at the heart of what it means to do math. We'll look at opportunities for - and try! - playful mathematics with small shifts, focused activities and actual games.

Friday, 10:30 AM

Prairie C

RunningHorse Livingston

Featured Speaker

CEO of *Mathematize Inc.*

STEM Outdoors: Exploring Environmental Science and Engineering

mathematize@outlook.com

Math

Discover simple, hands-on ways to connect STEM learning to the natural world right outside your classroom. In this session, participants will model investigations that use environmental restoration practices infused with Tribal Ecological Knowledge to tackle STEM challenges. We'll identify opportunities to integrate observation, measurement, data collection, and environmental stewardship while supporting curiosity and joyful learning. Teachers will learn how to honor diverse ways of knowing, engage students' identities, and connect learning to their real lives.

Friday, 10:30 AM

Dakota A

Leanne Holdorf

Sioux Falls Lutheran School

This Session is Under Lock and Key!

lholdorf@sflutheranschool.com

Middle School, High School, College

Science, Math, STEM

See in real time how breakout boxes can create memorable learning experiences for students. Build your own template to fit your classroom resources, including using Google Forms for a digital version.
